What assessment tests are available to speech therapists? How are they best used? Originally published in 1993, Assessment in Speech and Language Therapy was designed to guide speech therapists in choosing the most appropriate assessments for evaluation, monitoring and intervention at the time. By providing guidance on defining the issues in assessment, it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients. The major issues involved are discussed in detail, in particular how to make sure that assessments are relevant to individual needs. This title will be invaluable to all speech therapists and clinical psychologists working in this area.

Geared for undergraduate and graduate students, Goal Writing for the Speech-Language Pathologist and Special Educator details different types of goals, essential elements of goals, how to establish goals from information garnered from evaluations, and how to write continuing goals for the field of Speech-Language Pathology and Communication Sciences. It is written for students in a Clinical Methods/Clinical Practicum course who are about to being their clinical experience in SLP. Real-world exercises are provided throughout in order to provide realistic examples of what students may encounter in speech and hearing clinics, hospitals, and schools. Goal writing is practiced by SLPs on a daily basis, and understanding how to turn diagnostic information into therapy is a difficult, yet crucial, task. This important subject is not covered in depth in other clinical methods titles yet is a skill all students and clinicians must master.

- Includes forms with calculation and editing capability provided in cross-platform formats for easy customization- Features searchable text to locate key words quickly to speed research- Provides links to the Internet to keep on top of the latest reference information (for users with connection through an Internet Service Provider)- Offers the ability to copy and paste content to other assessment materials

A GUIDE TO CLINICAL ASSESSMENT AND PROFESSIONAL REPORT WRITING IN SPEECH-LANGUAGE PATHOLOGY, 1E not only provides guidance for the often overwhelming process of assessing speech and language disorders but also offers robust diagnostic report writing tools in one user-friendly resource. Organized by disorder, this book is the only one to provide a sample report for each of the major communicative disorders discussed. It also includes a chapter devoted to basic report writing skills and grammar. The assessment aspects of the book offer an in-depth chapter on counseling, a detailed and comprehensive chapter on dysphasia for both pediatric and adult populations, and a clear and practical chapter on assessment of accent. Each chapter is written by experts in their area of communication disorders and provides the following information: background and characteristics of the disorder; parameters for assessment; pertinent interview questions; an inventory and explanation of relevant formal and informal assessment measures in narrative and table format; a section on differential diagnosis to assist in teasing out the specific problem; and a sample case history with assessment tools chosen for that vignette along with rationale for making such selections. All this information is woven into a sample diagnostic report and a similar assignment is provided for practice, making this an ideal resource for ESL learners as well as students preparing for the praxis. Every chapter includes a list of key vocabulary and a glossary to familiarize your students with the professional vernacular relevant for writing diagnostic reports. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
