The reader's journey is not unlike that of Dorothy from Kansas who is unpredictably severed from the security of all that she has known to be confronted with the ultimate change (Friends, environment, culture, life goal etc...). The Wizard of Oz by L. Frank Baum is an allegory of self-discovery and empowerment.

Describes how to create an effective learning environment in which students share common interests and goals.

This book makes a case for backing away from our narrow focus of fixing problems to encompass a broader view of what works in schools. It is a resource that summons us to step back, take a deep breath, and search for the common ground of supporting the next generation to be healthy and whole human beings. It offers a way to view one's classroom and school as a commons that is influenced by the school culture and climate; which, in turn, influence the creation of a sense of community. From this view, teaching and learning can take place in a context of sharing, support, and collaboration. Students can take necessary risks to learn because they allow themselves to be open to ideas and different ways of knowing. In the process they can learn and practice what it means to work with others, act with integrity, and take responsibility. This book deftly bridges the gap between conventional and experiential/adventure education by re-casting the classroom teacher as educator/facilitator/guide. It is user friendly and empowers teachers to cultivate flexibility within their educational practice and to use their mind, intuition, knowledge, and the growing body of research available to identify where their students actually are and give them what they need, not what standards say are appropriate. The theory, research, and discussion of social/emotional competencies is solid! This is what we need to make our case in public and conventional private schools. This book is timely and appropriate in that it meets schools' needs and desires for culture and climate change, addressing bullying, social justice, and social/emotional development while balancing those needs against the needs for research-based instruction and curriculum design and the requirements to meet state standards (in many cases).

Empower your students instead of coercing them through punishments and external rewards. Engaged by the activities in this character education curriculum, students will choose responsible behavior. Help your students master communication skills, create plans, make decisions, solve problems, and resolve conflicts. Your efforts will build classroom communities that support character development, individual and social responsibility, and academic excellence.

Towards Inclusion of All Learners through Science Teacher Education serves as a resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science by connecting their experiences to leading experts

The mission of this forty-eight chapter Handbook is to provide a comprehensive reference source that integrates counseling theory, research and practice into one volume. It is designed to meet the needs of entry-level practitioners from their initial placement in schools through their first three to five years of practice. It will also be of interest to experienced school counselors, counselor educators, school researchers, and counseling representatives within state and local governments.

Addressing social justice issues in a physical education context is necessary both at the higher education and PK-12 settings. Limited undergraduate and graduate programs educate their students about social justice issues, thus, resulting in licensed teachers who lack the content knowledge, comfort level and pedagogical tools on how to educate students about issues related to social justice. Grounded in the transformative pedagogy theoretical framework, this book will offer practical lessons and strategies on a wide variety of social issues (e.g., body, race, self-identity, immigration) that can be used in teacher education and the PK-12 setting. The goal is for teacher educators and practitioners to feel more comfortable with teaching about and for social justice and believe this resource will enhance their content and pedagogical knowledge in the quest to achieve that goal. The purpose of this book is to provide physical education teacher educators and PK-12 physical education teachers with lesson plans and resources on how to address social justice issues in a physical education setting. This book will include sample lesson plans/activities that address a wide variety of social issues □ the what, the how and the challenges and possibilities that the author(s) encountered when teaching such a lesson/activity. Addressing social justice issues has been limited in physical education, both in higher education and PK-12, especially in the United States. Numerous scholars, internationally, have engaged in research studies that explored how social justice issues are addressed in physical education teacher education. Although we have research to support the limitations and complexities of teaching about sociocultural issues and for social justice, a more practical resource for teacher educators and inservice teachers is needed. The market for this book will be physical education teacher educators and PK-12 physical education teachers throughout the world.

Some books address outdoor leadership; others focus on adventure programming. None delve into the specifics of both topics like Effective Leadership in Adventure Programming, Third Edition, does. The first edition of this book helped define the body of knowledge for an emerging profession. Two editions later, this groundbreaking text □ now in full color □ provides adventure leaders with the tools and evidence they need to show that their outdoor programs are effective and have a lasting impact on their participants. Internationally renowned authors Simon Priest and Michael Gass have significantly updated the content, based on the latest research, issues, and trends in the field of adventure education and leadership. They have reorganized chapters to conform to their new model of building core competencies. In addition, this third edition includes the following features: □ Material on technology, social justice, cultural adaptation, sustainability, and facilitation techniques □ An online instructor guide that offers activities, discussion questions, and assessments compiled from a group of acclaimed instructors □ A digital field handbook that offers quick reference to key models, concepts, and checklists covered in the text □ An expanded version of global perspectives, valuable for long-standing programs as well as those just beginning to enter the field Effective Leadership in Adventure Programming details both the art and science of adventure leadership, helping a new generation of outdoor leaders develop their skills. The text extends the focus on evidence-based models, theories, and best practices, showing that science and research are as important to the profession as the natural beauty of the environment. The book describes the core competencies of outdoor leadership, providing a framework that helps leaders connect with participants in meaningful ways, based on mutual goals. The focus on the science side is invaluable to new leaders and less-experienced leaders, and it is a great refresher for leaders with more experience. This new edition offers a more detailed look at diversity and cultural competencies, preparing leaders to effectively manage diverse populations of participants. In addition, the content is in line with the updated accreditation standards from the Association for Experiential Education. The opening chapters of Effective Leadership in Adventure Programming supply a solid foundation in the research, philosophy, ethics, and history of outdoor leadership. Numerous chapters explore the skills leaders need, with topics that include technical activity, safety and risk management, environment, organization, instruction, and facilitation. The authors also examine leadership styles and conditional leadership issues, communication, sound judgment, decision making, problem solving, and the trends and issues in adventure programming. Effective Leadership in Adventure Programming will help readers understand the four adventure program areas □ recreation, education, development, and therapy □ and how they influence the delivery of outdoor leadership. The book is a valuable resource for the training and education of future outdoor leaders. It will help readers know why they should work in the profession and understand how they can make a difference by being an effective outdoor leader.

Restorative practice is a proven approach to discipline in schools that favours relationships over retribution, and has been shown to improve behaviour and enhance teaching and learning outcomes. However, in order for it to work, restorative practice needs a relational school culture. Implementing Restorative Practice in Schools explains what has to happen in a school in order for it to become truly restorative. Section 1 explains the potential of restorative practice in schools, describing the positive outcomes for students and teachers. It also outlines the measures that need to be in place in order to embed restorative practice. Section 2 examines the process of understanding and managing change, providing realistic and pragmatic guidance on the practical and emotional barriers that may be encountered. Finally, Section 3 provides in eight practical steps, strategic guidance for achieving a restorative culture that sticks. Featuring useful pro formas and templates, this book will be an indispensable guide for educators, administrators and school leaders in mainstream and specialist settings.
