A comprehensive introduction to the tools, techniques and applications of convex optimization.

This innovative book prepares students for the NCLEX-PN exam with thorough content review and 3,000 practice questions. Silvestri provides readers with information on NCLEX-PN preparation, test-taking strategies and the NCLEX-PN from students' perspectives. A free CD-ROM contains all 1,600 questions from the book plus 1,400 additional questions.

Dietary reference values (DRVs) for energy are based on estimating the total energy expenditure (TEE) for groups of people. TEE provides a measure of the energy requirement at energy balance i.e. when energy intake matches energy expenditure. The methodology to measure TEE - the doubly labelled water (DLW) method - has advanced and as a result, the evidence base on TEE in a wide variety of population groups has expanded considerably. With the high levels of overweight and obesity currently seen in the UK and the wealth of new data now available, it was considered timely for the Scientific Advisory Committee on Nutrition (SACN) to review recommendations for the UK population. This report details the evidence and approaches SACN have considered in order to update the DRVs for energy. SACN chose a prescriptive approach to estimating energy reference values; suitable reference body weight ranges consistent with long-term good health were used to calculate energy reference values. Thus, basal metabolic rate (BMR) values were predicted using healthy reference body weights. Using this approach, if overweight groups consume the amount of energy recommended for healthy weight groups, they are likely to lose weight, whereas underweight sections of the population should gain weight towards the healthy body weight range. SACN has derived new energy reference values. For most population groups, except for infants and young children, the values have increased. DRVs should be used to assess the energy requirements for large groups of people and populations, but should not be applied to individuals due to the large variation in physical activity and energy expenditure observed between people.

A comprehensive and rigorous introduction for graduate students and researchers, with applications in sequential decision-making problems.

A Practical Focus on the Skills and Concepts Essential to Your Success With an accessible, clear and student-friendly approach, Psychiatric-Mental Health Nursing clarifies challenging concepts and helps you build a foundation for working successfully with clients experiencing mental health challenges regardless of care setting. The text explores the full spectrum of psychiatric nursing, helping you master specific nursing interventions, hone your therapeutic communication skills and learn to apply content effectively within the framework of the nursing process. New! Unfolding Patient Stories written by the National League for Nursing put the nursing process in a realistic context to prepare you for successful client interactions and interventions. Clinical Vignettes familiarize you with the features of major disorders you are likely to encounter in practice. Therapeutic Dialogues help you perfect your communication skills with specific examples of nurse-client interactions. Best Practice boxes provide the latest evidence-based findings in psychiatric nursing. Self-Awareness features foster your personal and professional development through self-reflection. Concept Mastery Alerts clarify important concepts essential to your classroom and clinical success. Watch and Learn icons point you to corresponding true-to-life Lippincott® Theory to Practice Video Series videos for a richer understanding of important mental health disorders. Built-In Study Guide reinforces your understanding with multiple-choice questions, multiple-response questions and clinical examples at the end of each chapter. Nursing Care Plans demonstrate effective approaches for addressing specific client disorders. Drug Alerts highlight essential concerns related to psychotropic drugs.

Warning boxes alert you to FDA considerations for specific medications. Cultural Considerations help you ensure culturally sensitive care for a wide range of client populations. Elder Considerations sections prepare you to care for the growing population of older adults. Client/Family Education boxes boost your teaching capabilities. Nursing Interventions detail key treatment strategies for specific disorders. DSM-5 Diagnostic Criteria boxes summarize the medical diagnostic features of specific disorders.

**Advanced Dynamics: Analytical and Numerical Calculations with MATLAB** provides a thorough, rigorous presentation of kinematics and dynamics while using MATLAB as an integrated tool to solve problems. Topics presented are explained thoroughly and directly, allowing fundamental principles to emerge through applications from areas such as multibody systems, robotics, spacecraft and design of complex mechanical devices. This book differs from others in that it uses symbolic MATLAB for both theory and applications. Special attention is given to solutions that are solved analytically and numerically using MATLAB. The illustrations and figures generated with MATLAB reinforce visual learning while an abundance of examples offer additional support.
