*Trisomy 18 Radiological Society Of North America*

Trisomy 18 | Radiology - Radiological Society of North America Edwards syndrome, also known as trisomy 18, along with Down syndrome (trisomy 21) and Patau syndrome (trisomy 13), make up the only three autosomal trisomies to be compatible with extrauterine life in non-mosaic forms, albeit in the case of Edward syndrome only for a week or so.

*Trisomy 18 Radiological Society Of North America*

Dr Daniel J Bell and Assoc Prof Frank Gaillard et al. The trisomies are chromosomal anomalies which usually occur due to non-disjunction. The vast majority of affected fetuses are spontaneously aborted, often very early during gestation. Only three are compatible with extrauterine life (T13, T18, T21), and only one beyond early infancy (T21).
