The first-ever collection of poetry by trans and genderqueer writers

A reprint of trans poet, activist, and teacher TC Tolbert's beloved debut collection of poetry. In Gephyromania (literally, an addiction to or an obsession with bridges), Tolbert's choice isn't between female and male, lover and self, or loss and relief, but rather to live in the places where those binaries meet. Is a bridge simply an attempt to connect one body back to itself? Sensing the parallels between a lover who leaves and his own female body as it chooses to recede, the poems in Gephyromania explore the spaces between, among, across, and even within bodies.

Poetry. In Tim Peterson's first collection of poems, SINCE I MOVED IN, "...desire is the restless remainder of body subtracted from voice, or maybe it's voice from body. Whitemanian in its quick and tender grandeur, its penchant for direct address, and its abstract kinkiness and longing, SINCE I MOVED IN moves exorably from the transgenering (non) performance of 'Trans Figures' to the startled, suspended chilliasm of 'Spontaneous Generation,' where at last the fetish body, dispersed into landscape, becomes simply an ambient mode of seeing, or saying, in a post-everything ecology where voice broods over the face of the waters, becoming the (prosthetic) body of the world"--Tenny Nathanson.

Poetry. LGBTQIA Studies. Introduction by Joy Ladin. A new & revised edition of the classic book by pathbreaking poet & cultural critic Trace Peterson. "The second edition of Trace Peterson's SINCE I MOVED IN (NEW & REVISED) is a welcome re-issue, with a new introduction by Joy Ladin, of a landmark collection of poems by one of the most influential transgender poets writing today. Peterson, enacting her self-chosen name, traces connections and lines of flight between genders, between creative expression and acute observation, between her grounding and training in Tucson's celebrated poetry scene and her on-going involvement in New York's. Trace is an imperative, as well as a noun, and a name. It means to write over, as well as a faint remainder. Animated by the space of that double signification, and by the practice of making new life through transcribing an old life into a new register, Trace Peterson's poetry--in life and in words--gives voice to something raw, inchoate, in-process-of-becoming."--Susan Stryker "These are the daring adventures of the voice, the voice that wants to be a body, and had no way to be a body in and for itself when this book was written: this book is maybe the first book of poetry in which I saw my own trans experience written and comprehensibly embodied, not allegorically or across a gap of anachronisms but as it is, as it was at the very same time. This is the voice that kept secrets from itself, that knows what it's like to keep a secret and wonder whether it was never a secret; the voice, too, that knows how troubling it feels to be a voice, to be nothing other than voice, among readers and listeners who claim, in that early-2000s way, to hate voice (because they cannot hear their own). There is a Hartford in her heart, "no broken glass in it," though "the map is not the map," and alongside it there lurks, or flourishes, an "inability to be where I am." This is a voice that sees: that sees 'the boys at / lavender the girls in show,' a voice of experiment, a voice 'wearing your socks.' I recommend it to anyone like me, and also to people who are nothing like me, who want to know how it has been."--Stephanie Burt "I will forever praise the day in 2010 when I discovered SINCE I MOVED IN at a friend's house and sat down and read it cover to cover. Almost a decade later, my 'skull still humming from a gift received.' The experience of recognition (which is to say the benevolence of awareness) (which is different from the more distant (more dangerous) act of seeing/being seen) that transpired in the initial hours with this book altered the trajectory of my life in simple and extraordinary ways. As Joy Ladin's introduction to the new edition makes clear, SINCE I MOVED IN's 2007 publication was revolutionary and foundational for what would become a beautiful groundswell of trans and nonbinary poetry. 'Even the boundaries were drawn up temporarily,' Trace tells us. And how deeply true this is between so many (so much) of us, on any given day. Thank you, Trace, for this 2nd edition--a kind of textual transition, a gift to trans and nonbinary writers, past, present, and future. Here is 'The Pleasure of Arriving': a poetry of integrity--smart, hilarious, frustrated, and tender."--TC Tolbert

In the epic fifth installment in this "compulsively readable" (People) series, Galbraith's "irresistible hero and heroine" (USA Today) take on the decades-old cold case of a missing doctor, one which may be their grisliest yet. Private Detective Cormoran Strike is visiting his family in Cornwall when he is approached by a woman asking for help finding her mother, Margot Bamborough--who went missing in mysterious circumstances in 1974. Strike has never tackled a cold case before, let alone one forty years old. But despite the slim chance of success, he is intrigued and takes it on; adding to the long list of cases that he and his partner in the agency, Robin Ellacott, are currently working on. And Robin herself is also juggling a messy divorce and unwanted male attention, as well as battling her own feelings about Strike. As Strike and Robin investigate Margot's disappearance, they come up against a fiendishly complex case with leads that include tarot cards, a psychopathic serial killer and witnesses who cannot all be trusted. And they learn that even cases decades old can prove to be deadly . . .

Poetry. LGBT Studies. In GEPHYROMANIA (literally, an addiction to or an obsession with bridges), Tolbert's choice isn't between female and male, lover and self, or loss and relief, but rather to live (willingly, intentionally) in the places where those binaries meet. Questions arise: Is a bridge simply an attempt to connect one (seemingly) stable body back to itself? Whose body--which embodiment--is absent when we say "I miss you"? And who is adored when we say "I love"? Sensing the parallels between a lover who leaves and his own female body as it chooses (as he chooses for it) to recede, the poems in GEPHYROMANIA explore the spaces between, among, across, and even within bodies.

An anthology of poems by trans writers that explores the relationship between explicitly political desires and the formal inventions possible to enact or imagine those desires.Who is writing formally exciting, explicitly political poetry right now? Editors, Andrea Abi-Karam and Kay Gabriel bring together contributions by an intergenerational constellation of radical trans writers to both answer this question and enable writing in these modes. Writing in dialogue with emancipatory political movements, against capital, racism, empire, borders, prisons, ecological devastation; the writers here imagine an altogether different, overturned world in poems that pursue the particular and multiple trans relationships to desire, embodiment, housing, sex, ecology, history, pop culture and the working day. The editors offer this anthology as an experiment: how far can literature written and/or collected from an identitarian standpoint go as a fellow traveler with social movements and revolutionary demands?

These poems, likened to Elizabeth Bishop's, are about desire, love, seeing, gender, difference, ecology, queerness in the "natural" world, loss, LGBTQ lineage, and its community. They contain a sinuous, shape-shifting quality that makes her explorations of sex and selfhood all the more resonant. Jenny Johnson won a 2015 Whiting Fellowship. She lives in Pittsburgh, Pennsylvania.

Goes beyond transgender to question the need for gender classification. Beyond Trans pushes the conversation on gender identity to its limits: questioning the need for gender categories in the first place. Whether on birth certificates or college admissions applications or on bathroom doors, why do we need to mark people and places with sex categories? Do they serve a real purpose or are these places and forms just mechanisms of exclusion? Heath Fogg Davis offers an impassioned call to rethink the usefulness of dividing the world into not just Male and Female categories but even additional categories of Transgender and gender fluid. Davis, himself a transgender man, explores the underlying gender-enforcing policies and customs in American life that have led to transgender bathroom bills, college admissions controversies, and more, arguing that it is necessary for our society to take real steps to challenge the assumption that gender matters. He examines four areas where we need to re-think our sex-classification systems: sex-marked identity documents such as birth certificates, driver's licenses and passports; sex-segregated public restrooms; single-sex colleges; and sex-segregated sports. Speaking from his own experience and drawing upon major cases of sex discrimination in the news and in the courts, Davis presents a persuasive case for challenging how individuals are classified according to sex and offers concrete recommendations for alleviating sex identity discrimination and sex-based disadvantage. For anyone in search of pragmatic ways to make our world more inclusive, Davis' recommendations provide much-needed practical guidance about how to work through this complex issue. A provocative call to action, Beyond Trans pushes us to think how we can work to make America truly inclusive of all people.
