This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many--if not all--fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The books intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

Contributed articles with special reference to India.

Academic literacy for education students is an accessible textbook which teaches reading and writing skills, particularly within the academic environment. The book will equip students to use a range of linguistic practices that they will need for their education studies, with a view to entering the teaching profession. Rather than studying skills separately and in isolation, they will understand the relevance of literacy practices and develop a variety of communicative practices, including different text types, genres and disciplines.

In this fully updated Eight Edition of Leadership: Theory and Practice, a new chapter on Followership examines the central role followers play in the leadership process and unpacks the characteristics of both effective and ineffective followers. The new edition also includes a new Ethical Leadership Style Questionnaire and new coverage on the dark side of leadership and destructive leadership. Adopted at more than 1600 institutions in 89 countries and translated into 13 different languages, this market-leading text successfully combines an academically robust account of the major theories and models of leadership with an accessible style and special emphasis on how leadership theory can inform leadership practice. Peter G. Northouse uses a consistent structure for each chapter, allowing students to easily compare and contrast the various theories. Case studies and questionnaires provide students with practical examples and opportunities to deepen their personal understanding of their own leadership.

This works adopts a multidisciplinary approach to corporate communication, including management communication, public relations, organizational behavior and change, marketing communication, and advertising. The many-faceted approach adopts the perspective of a practicing communications professional, emphasizes corporate branding, and focuses on an integrated approach to communication.

Describes the principal findings of happiness researchers, assesses the strengths and weaknesses of such research, and looks at how governments could use results when formulating policies to improve the lives of citizens.
